BLEACHING CREAM - without ammonia with beeswax

With Beeswax hair is shiny and soft even after treatment of bleaching. The ability of bleaching depends on the color of the hair, the volumes of oxidant cream and shutter speeds. It lightens the hair without affecting the hair fiber and without drying the hair, leaving it shiny and soft. Makes healthy work environment being totally devoid of fine birds present in the normal powder bleaches. Complete absence of ammonia odor. The bleaching action takes place without damaging either the skin or the hair. The bleaching cream reduces product giveaway of the classic dust.
