INOILOXYGEN - oxidizing emulsion

Oxidizing emulsion fluid and creamy, specially designed to reduce the aggressiveness of the oxidative part and enhance the final result dellacolorazione. Its specific formulation for INOILNUANCES of Napura allows oxygen to combine with the color on the hair and act in an optimal way and deep, without altering the structure of the stem too. The rich presence of stabilizing agents favors the total activation of the base of treating dyes, ensuring a homogeneous coloring of hair and a controlled oxidation process throughout the application.

box: 1000 ml bottle
