STYLING CREAM MOISTURIZING CREMA STYLING IDRATANTE

Hydrating Styling Cream is a lightweight formula moisturizer that creates soft pleats for a natural feel. It softens, hydrates and fights frizz, especially in shaggy hair and dry. It also adds definition thanks to a soft seal and is essential for the folds with a hair dryer. It is also good to tame the rebellious strands and revive the folds of the day before.

method of use : 1-2 doses apply to damp hair and proceed to the crease in the usual way. The amount to be used varies depending on the type of hair. For more bristly hair and difficult to comb, mix with Hydrating Styling Cream MoroccanOil® Treatment, in order to ensure greater control during blow-drying. The Hydrating Styling Cream can also be applied to dry hair from mid-lengths to ends to revive, riapplicandola again as needed.
