FRAMCOLOR ECLECTIC FRAMCOLOR ECLECTIC

semi-permanent color

Framcolor ECLECTIC is the semi-permanent color that covers up to 50 % of white hairs (up to 80 % with the series IN). Utilizes the innovative technology capsulate Complex: a pool of ingredients consisting of essential fatty acids, sugar derivatives, amino acids and vitamin E, which has the function of capturing the color within the hair and protect it with a water resistant film and heat. Its formula without ammonia, without parafenilendiamina, with extract of black diamond and makes it delicate fragrance free and non-allergenic. Framcolor ECLECTIC does not fade, does not lighten the natural color does not change the base color. It is the perfect solution for those who approach for the first time or want to color a shade brighter, but not demanding, offering

- tone-on- tone
- tonalization streaking
- intermiscelabilità the nuances
- use on hair previously treated with coloring, permanent waving and straightening

method of use : Framcolor ECLECTIC mix with the oxidizer in the ratio 1:2

box: 60 ml tube
