SILK'N ADVANCE PROFESSIONAL SILK'N ADVANCE PROFESSIONAL

Silk'n Advance Professional

the first photo-epilation recommended by doctors for hair removal. Safe, easy to use and affordable, Silk'n Advance Professional results showed clinical drugs, even the best professional equipment worth several thousand Euros.

HPL Innovation

The Silk'n Advance Professional uses a new technology called Advanced Home Pulsed Light (HPL), created by its Home Skinovations Ltd. HPL uses the theory of selective photo thermolysis, where the optical energy (IPL) is used to lock the hair growth.
