BALL LAMP SYSTEM LAMPADA SFERA SYSTEM

New integrated system for the treatment and care of hair.

DESIGN

The main structure of SPHERE SYSTEM transparent plexiglass, besides representing an element of versatility and functionality, defines a modern and suited to enhance any decor

TIME REDUCTION TREATMENT

The jets of hot air machines are constantly pushing the heat back into space inside the device, preventing leakage and allowing the execution of colors, perms, drying and all treatments with a high shutter speed. This feature translates into better results, greater time available for the customers and energy savings.

FULLY PROGRAMMABLE

BALL SYSTEM offers a choice of preset automatic programs and the ability to manually intervene on the parameters of temperature, exposure time and ventilation, so as to leave the hairdresser maximum freedom of expression.
